Election/Restriction

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 20-25, drawn to methods of manufacture of a food additive, food ingredient, dietary product, food form or food.

Group II, claims 26-28 and 32-34, drawn to a method for treating hypertension.

Group III, claims 29-31, drawn to a method for treating obesity.

Group IV, claims 35-37, drawn to a method for reducing food intake.

The inventions listed as Groups I-IV, *supra*, do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

One could practice the invention of anyone of the above groups and not practice the invention of any of the other groups which supports the Examiner's position that the grouped inventions lack the same or corresponding special technical feature.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 1614

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
